Since 1998, DC Welding has provided our clients with a superior product, delivered on time while utilizing the safest practices in the industry.

We provide complete construction services in all branches of energy generation (Solar, Wind, Rail, Petrochemical, Ship/Barge, and Pipelines) as well as fabrication work, steel building erection, concrete foundations/road/bridge installation, site preparation, reclamation/restoration and asphalt plant service.

Our staff can assist our clients with Constructability Reviews, help them develop their Design Basis, Process Hazard Analysis (PHA), Process Flow Diagrams (PFD), Piping Instrument Diagrams (PID), Orthographic Drawings, Isometric Drawings, Field Inspection Services and Project Management for even the most complex projects.

We stand ready to support your company in your ongoing and future construction needs.
